DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Use of the term "overlapped" in the claim is unclear and appears inaccurate in that a frame of reference has not been previously established in the claim. What is meant, or rather, in what way do the engagement portions "overlap" each other? Is one on top of the other in terms of elevation?

Claim 1 recites the limitation "**when** said link is passed through a curved conveying section". There is insufficient antecedent basis for this limitation in the claim. Use of the term "when" renders the claim unclear. Is there a curved section?

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3651

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Palmaer USP 6,484,379 .

Palmaer discloses all of the claim limitations in a similar conveyor chain comprising a(n):

- Plurality of links arranged in rows
- Top plate (fig. 1 & 4) having a flat top surface & hinge portion
- Flat surface portions (fig. 5) connected to said flat top portion of said top plate, said flat surface portions are extended to said adjacent link (seen in fig. 1)

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Horton USP 5,921,379 .

Horton discloses all of the claim limitations in a similar conveyor chain comprising a(n):

- Plurality of links arranged in rows (fig. 3A)
- Top plate (24) having a flat top surface & hinge portion (34)
- Flat surface portions (fig. 3A) connected to said flat top portion of said top plate, said flat surface portions are extended to said adjacent link
